THE OFFER OF PRINT UNLIMITED

Print Unlimited produces textile prints on demand and enables you to outsource your print production. We produce high quality textile prints, from 1 until thousands of meters, with a short delivery time.

Our highly skilled staff consists of people with years of experience in textile design and printing and can therefore translate every idea and/or project of yours into a print on textile which meets your demand. The input can consist of digital data, an original drawing, photo or photo-negative. Designs are being processed via a CAD-system.

We use the newest generation of digital printers that are especially designed for the direct printing of fabrics. Thus we are able to produce extraordinary prints which cannot be achieved by means of standard techniques: prints of unique designs, perfect details, big formats in an unlimited number of colors. All these prints can be realized on a very extensive range of fabrics.

Print Unlimited produces a lot of printed fabrics for the fashion, interior and promotion market. We also provide high quality prints to artists, design studios and theatre productions.

We guarantee an excellent color brilliance and a faithful reproduction of complex designs, even on delicate fabrics, while the feel of the fabric remains the same. The prints will be fixated and remain authentic. The printed fabrics can be cleaned following washing instructions.

A great number of fabrics is in stock: cotton, silk, rayon (viscose), linen, wool, polyester and polyamide. Furthermore it is possible to print on a fabric supplied by the customer.

We can also arrange the sewing of a number of articles for you.

TECHNICAL DETAILS

Colorants	Reactive dye for natural fibers, acid for polyamide/elasthane and disperse dye for polyester fabrics
Width	Maximum width of the fabric – 155cm. Maximum available width for printing – 150cm However, most stock fabrics are not that wide, ask width before editing your files
Fabrics	All natural fibers such as silk, cotton, rayon (viscose), wool, linen and several polyamide and polyester fabrics.
Available drivers	CD-ROM, DVD, E-mail, FTP or WeTransfer.
File Format	Tiff-CMYK, Tiff-Lab or Photoshop.
Digital Data	Preferably real size and in a resolution of 180 DPI
Prices	Depends on the number of meters, the quality of the fabric and the choice of materials.
Delivery Time	In case fabric of your choice is in stock, production time is 5 working days for test prints (+shipping), 10 working days (+shipping) for small productions and big productions depend on planning but usually within 30 working days (+shipping).

THE COURSE OF YOUR ORDER

1. We discuss your concept, idea or concrete product

What is most important is the product for which you need a digital print. As digital printing is so flexible, we can adapt the print, the lay-out and the placement exactly to your wishes and logistic process. Thus we try to avoid problems during your production and to decrease the costs per product.

2. You choose a fabric from our collection of over 100 fabrics or supply your own fabric.

It is important to be able to choose from a vast collection of fabrics. On our website www.printunlimited.nl you can see the fabric collection which changes regularly based on the wishes of our customers. You will find the following information on the website:

Nr.	: The number of the fabric, which is unique for each quality.
Fabric	: The name of the fabric
Composition	: The fibers in this fabric. CO=Cotton, EL=Elasthan, MO=Modal, LI=Linen, RY=Rayon, SI=Silk, WO=Wool, PA=Polyamide, PES=Polyester.
Weight	: Weight of the fabric in grams/m ² .
Usable width	: Usable print with of the fabric in centimeters.
Description	: explanation of the touch, feel and qualities of the fabric.
Taric Codes	: export number needed by customs to transport fabrics.
Cleaning instructions	: recommended cleaning instructions.
Applications	: Applications where the fabrics are mostly used for.

Fabric swatches

There are two different ways to send you fabric samples. For one, we offer a complete fabric book. The costs for this fabric book are €95 (+ €19,95 VAT). With our fabric book you will also receive a coupon of €95. You can turn this coupon in when you place a new order of at least €400 with Print Unlimited.

The other way is for you to select the fabric swatches from the fabrics you are interested in online in our fabric catalogue. In this case, we can send you the separate swatches with a sample print on it. Hence, it is quite valuable to send them, so be critical in your selection.

Call us if you need advice on selecting a fabric, we are happy to assist you.

Customer fabric

Is the fabric of your choice not in our collection? You need 50 meters or more? Maybe we can source the fabric of your choice at our suppliers, or in most cases, we can also print on fabrics supplied by the customer. What to do? We need to know the fiber composition, structure and width of the fabric. It has to be delivered to us Prepared for Printing PFP (which is not always the same as Prepared for Dyeing) and the base color has to be as white as possible. Send us a sample of your fabric so we can assess the suitability. After we have prepared your fabric for digital printing we print test prints in order to assess the print quality. We will keep your fabric, ready for printing, in stock. Ask our pretreatment prices if you are interested. Keep in mind that during the printing process and finishing, some of your fabric may be lost. You always have to deliver more meters of fabric than you want to have printed.

Unprinted fabrics

We also deliver unprinted finished fabrics in addition to printed material.

Cleaning instructions

All printed fabrics are washed before they are shipped. On request we can send cleaning instructions that we recommend.

Finish

On your request we can finish the fabrics with softeners, water repellent or starch.

3. You send us your design accompanied by color references and an order confirmation.

We can work with either digital data, a slide, a photo, photo-negative or original artwork. You can also deliver your print design, painting, drawing or 3D object and we will digitalize it for you. The cheapest and quickest way is to deliver your design digitally and if necessary in repeat. Furthermore, if possible, we need a color reference, like a pantone specification, color test of color print.

Digitally	Preferably in real size with a resolution of 180 DPI.
File Format	Preferably Tiff-LAB, Tiff-CMYK, Photoshop or eps-files.
Available drivers	CD, DVD, E-mail or FTP

Upload

Often it does not work to e-mail large files and saving information on a CD takes a lot of time and moreover the shipment is very expensive. You can request a FTP-account with us. By means of an online FTP-connection you can send us your designs rapidly and in all different sizes.

This is how it works

1. When you place an order, please ask you sales agent to create an account for you.
2. He/She will send you an e-mail mentioning the link to the FTP, your username and password.
3. You can log in and upload your files
4. After upload is complete, please specify the order to your sales agent and refer to the FTP for files.

4. We open a portfolio for your order

In your portfolio we save your designs, the tests and test materials and so on. Your final print data will be saves in our digital production archive for 1 year. This way you can re-order your prints quickly and it is possible to quickly make variations on your existing prints.

5. We prepare your order for printing and if required, we send test prints or strike-offs.

In our studio we convert the material you provided into data and instructions for the printer. Together with you we determine where the print will be placed and repeated. We furthermore select the right color profiles suited for the chosen fabric. If necessary, we first make test prints. A **Test print** is when you have sent your files to be printed, we take a 25cm by 25cm part out of the design and print the original and 4 color variations on the fabric you eventually want to print on. That way you can see what your digital file looks like on the fabric and choose the version you prefer before you actually get started.

You can also choose to have a strike-off. A **Strike off** is when you want to print one meter of each design first to see the print before you order the total amount of meters.

The production staff will always stay in touch with you and will try to identify your style and wishes as much as possible.

Panel addition in case of printing long panels:

Are you printing as an all-over (repeat) or a loose panel? As the chance of mistakes gets bigger when you print larger panels we hold 10% panel addition to the price when the panel is between 150cm and 250cm, when it is 250 – 350 the panel addition is 20%. When you pay this extra fee, it is a sort of insurance, because when anything goes wrong somewhere in the panel in the production process, we will reprint it on our costs.

6. We produce your order and ship the fabrics to the address indicated by you.

After production and quality control the printed fabrics are ready for shipment. Usually, we arrange the shipment for you. The cargo is not insured and the customer is responsible for the risk during transport. If required by you, we can insure your goods. You can also arrange shipment yourself and furthermore, we can also deliver your goods to a third party.

7. All the data and a test print will be saved in your portfolio

After delivery, the final invoice will be issued based on the delivered quantity. All production data and tests will be archived, so a re-order can be produced quickly and in an equal quality.

8. At any time you can re-order a number of meter or a number of prints.

At any time your re-order a desired number of prints/meters of all prints that we made for you in the past. So you can first bring in orders from your customers and then have the prints produced. You can plan part deliveries, early or late deliveries. We print on materials that we have in stock and of which the quality is closely monitored. We save the production data of every delivery for at least one year. Re-orders are produced on the same materials and in the same production settings in order to minimize quality differences. In a production order we add up all the meters of various designs and colors printed on the same fabric, so we will be able to offer you a lower price per meter.

For how long will the colors remain good?

In the printing process we only use textile colorants. During the after treatment of the fabrics, these colorants will be indissolubly linked to the fibers. Then we wash and iron the fabrics. The colors will last for a very long time because of these qualitative treatments. Usage, sun and cleaning however causes to wear the fibers and thus also the colors. Print Unlimited provides cleaning instructions for the printed fabrics for an optimal treatment.
